Ajay Gangwar

Full Stack Java Developer

Noida, Uttar Pradesh | +91-9720576210 | gangwar030@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Java Developer with **1.4 years** of hands-on experience building and shipping scalable web applications. Currently working on an enterprise **LIMS platform (ITC)** with an **Angular + Spring** stack at Vibe Internet Solutions. Proficient in **Spring Boot, REST APIs, React.js, Spring Security (JWT), Docker, and AWS**. Built AI-integrated products using **Gemini API** and delivered end-to-end deployments on AWS EC2 / S3 / CloudFront. Passionate about clean architecture, performance optimization, and solving real-world problems.

Technical Skills

Languages: Java, JavaScript (ES6+), SQL

Frontend: React.js, Angular, Redux, HTML5, CSS3, Bootstrap, Material UI, Tailwind CSS

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT, OAuth 2.0, JSP & Servlets, Apache Tomcat

Database: MySQL (Schema Design, Query Optimization), MongoDB, Redis

DevOps / Cloud: Docker, AWS (EC2, S3, CloudFront), Render, Railway, Vercel, GitHub Actions (CI/CD)

AI / APIs: Gemini Generative AI, RESTful API Design, Web3Forms, Rapid APIs

Tools: IntelliJ IDEA, VS Code, Eclipse, Postman, Git, GitHub, Maven, Swagger / OpenAPI

Concepts: OOP, DSA, Design Patterns, MVC, Exception Handling, Pagination, RBAC

Professional Experience

Vibe Internet Solutions

Aug 2026 – Present · Mohali, Punjab

Java Developer · ITC Project (eLabs LIMS Platform)

- Engineering enterprise-grade features for ITC's **Laboratory Information Management System (LIMS)** on an **Angular 15** frontend and a distributed, multi-service **Java Spring** backend (**lims-server, elabs-core, elabs-sidecar**).
- Delivered end-to-end functionality across the **MIS**, **Test Data Sheet (TDS)**, and **Forecast** modules, among others, spanning UI components, REST services, and **MongoDB**-backed data-layer logic.
- Built **metadata-driven, configuration-first** modules (menus, templates, dynamic grids, POJO–collection mappings), reducing hard-coded UI/backend coupling.
- Own **cross-service integration** across tightly coupled **lims-server, elabs-core, and elabs-sidecar** services, tracing inter-service dependencies and module-metadata registration to ship reliable fixes and enhancements.

Uncodemy

Apr 2025 – Apr 2026 (1.1 yrs) · Noida, UP

Full Stack Java Developer

- Developed and deployed full-stack web applications using **Java, Spring Boot, MySQL, React.js, and Bootstrap**, serving production traffic.
- Built RESTful APIs with validation, exception handling, pagination, and **Spring Data JPA / Hibernate**; implemented **Spring Security + JWT** with role-based access control (RBAC).
- Refactored React components using Hooks; applied lazy loading & code splitting → **˜20% faster page load**; improved form handling & validation → **˜15% higher user engagement**.
- Containerized applications with **Docker**; deployed on **AWS EC2, S3, CloudFront**, Render, and Railway; used **Git / GitHub**, peer code reviews and agile sprints.

Projects

StubLine — Real-Time Event Booking & Payment Platform

GitHub

Java · Spring Boot · Spring Security (JWT) · MySQL · Redis · Apache Kafka · WebSocket · React · Razorpay · Docker

- Engineered a real-time seat-booking system using **Redis distributed locking (SETNX)** and **WebSocket/STOMP**, resolving concurrent-booking race conditions with live seat-status sync across clients.
- Integrated **Razorpay** payments with server-side **HMAC-SHA256** signature verification and a webhook-based backup confirmation path; designed **Kafka**-driven async processing for PDF ticket (Apache PDFBox) and QR code (ZXing) generation.
- Implemented **JWT/RBAC authentication** (email-password, OTP, Google OAuth) with a tiered admin role hierarchy, plus a full admin operations layer for event lifecycle management and analytics.

AI Email Assistant — Chrome Extension + Web App

GitHub | Live Demo

React (Vite) · Spring Boot · Gemini API · AWS EC2 · S3 · CloudFront · Material UI

- Engineered a scalable AI email assistant with **context-aware, tone-optimized replies** via Gemini Generative AI.
- Developed a **Chrome Extension (Manifest V3)** for in-inbox AI replies; deployed on AWS with HTTPS, CloudFront CDN, and CORS config, resolving production 403/405 routing issues.

TradeFlow — Portfolio & Transaction Management

GitHub | Live Demo

Java · Spring Boot · Spring Security · JWT · Spring Data JPA · Hibernate · MySQL · Lombok

- Built real-time trade & wallet management system with modular REST APIs for orders, wallets, and transactions.
- Secured with **JWT-based Spring Security**; added Spring Actuator health checks for production observability.

Education

Master of Computer Application (MCA)

2024

Dr. A.P.J. Abdul Kalam Technical University (AKTU)
