Summary

Java Full Stack Developer skilled in building scalable web applications using Spring Boot, RESTful APIs, React.js, and MySQL. Strong understanding of authentication, ORM, relational mappings, and MVC design. Enthusiastic about clean code, problem-solving, and continuous learning.

Skills

HTML

CSS

JavaScript(ES6+)

Bootstrap

React.js

Redux

Java

Spring Boot

Spring Security

Spring Data JPA

Hibernate

JDBC

JSP & Servlets

MySQL

RESTful API

XML

JSON

YAML

VS Code

Eclipse

Git

GitHub

Postman

RapidAPI

Maven

Apache Tomcat

OOPs

MVC Architecture

JWT Authentication

Exception Handling

Microservices

Languages

Hindi, English

Education

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Master of Computer Application (MCA)

Mahatma Jyotiba Phule Rohilkhand University (MJPRU)

Post Graduate Diploma in Computer Application (PGDCA)

Experience

Uncodemy

Java Full Stack Developer Intern

Gained practical experience in building full-stack applications by utilizing Java, Spring Boot, MySQL, HTML, CSS, Bootstrap, JavaScript, and React.

Designed and optimized persistence layers using Spring Data JPA, Hibernate, and relational mappings like One-to-Many and Many-to-One.

Performed CRUD operations, implemented Exception Handling, Validation, and Pagination for better performance.

Integrated Spring Security with role-based authentication & authorization, implemented a custom login page, and protected endpoint access.

Improved user engagement by 15% by redesigning the UI/UX of a mobile app.

Built responsive, user-centric UI screens using HTML, CSS, Bootstrap, and FontAwesome, improving cross-browser compatibility and accessibility.

Projects

Personal Portfolio Website (React)

- Developed a fully responsive portfolio using React.js showcasing projects, experience, and technical skills.
- Integrated Web3Form API to securely handle contact form submissions without backend.
- Added a "Hire Me" CTA allowing recruiters to directly download the resume.
- Implemented clean UI/UX design with reusable components for performance optimization.

TradeFlow – Portfolio & Transaction Management System

- Built a backend-driven financial management system using Spring Boot to track stock trades, wallet balance, and performance in real-time.
- Implemented Wallet Order Placement & Transaction modules ensuring accuracy.
- Used Spring Security for secure user access control.
- Integrated Spring Data JPA with Hibernate ORM for seamless CRUD operations.
- Built RESTful APIs for order execution, balance updates, and transaction retrieval.
- **Tech Stack:** Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, MySQL, REST API.
