

AJAY GANGWAR

Full Stack Java Developer

SUMMARY

Java Full Stack Developer with 1.1 years of hands-on experience in designing and building scalable web applications using Spring Boot, RESTful APIs, React.js, and MySQL. Experienced in implementing secure authentication, relational mappings, and MVC architecture. Passionate about writing, maintainable code, solving real-world problems, and continuously upgrading skills.

CONTACT

-  Noida, Uttar Pradesh

-  Github

SKILLS

-  **Frontend Development** : HTML5, CSS3, JavaScript(ES6+), Bootstrap, Material UI, React.js, Redux
-  **Backend Development** : Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, JDBC, JSP & Servlets, Microservices, Apache Tomcat
-  **Web Services / APIs** : RESTful APIs, JSON, XML, YAML, JWT (JSON Web Token)
-  **Database** : MySQL
-  **Core Concepts** : Object-Oriented Programming (OOPs), Model-View-Controller (MVC), Exception Handling
-  **Tools & Platforms** : VS Code, IntelliJ IDEA, Eclipse, Git, GitHub, Postman, Rapid APIs, Maven, Docker
-  **Deployment** : AWS, EC2, S3, Cloudfront, Docker-based Deployments, Vercel, Render, Railway, InfinityFree

EDUCATION

- Master of Computer Application (MCA)**
Dr. A.P.J. Abdul Kalam Technical University (AKTU)
2024
- Post Graduate Diploma in Computer Application (PGDCA)**
Mahatma Jyotiba Phule Rohilkhand University (MJPRU)
2022

LANGUAGES

- Hindi (Native)
- English (Professional)

PROFESSIONAL EXPERIENCE

Uncodemy

Jan 2025 – Jan 2026

Full Stack Java Developer

- Developed and deployed full-stack web applications using **Java, Spring Boot, MySQL, HTML, CSS, Bootstrap, JavaScript, and React**.
- Built & optimized backend systems:
 - Implemented RESTful APIs, Added input validation and custom Exception handling
 - Integrated Spring Data JPA, Relationship Mapping and Hibernate for ORM
 - Added input validation, custom exception handling, and pagination
- Implemented secure authentication system:
 - Integrated Spring Security with JWT-based authentication
 - Developed custom login flow and protected endpoints
- Enhanced web app UI/UX & performance:
 - Refactored React components using Hooks (useState, useEffect)
 - Applied lazy loading, code splitting → **~20% faster load time**
 - Improved form handling & client-side validation → **~15% higher engagement**
- Deployment & collaboration:
 - Containerized using Docker, deployed on AWS EC2 / S3 / Render / railway
 - Managed code via Git & GitHub, participated in code reviews

PERSONAL PROJECTS

Personal Portfolio Website

HTML5 CSS3 Bootstrap JavaScript React.js Web3Form API

Built a responsive React.js portfolio showcasing projects & skills with modern UI. Implemented a refined client-side resume download flow to elevate overall usability and interaction quality. Implemented clean UI/UX design with reusable components for performance optimization. Integrated Web3Form API for secure contact form submissions. Optimized the app's performance through code splitting → **25% faster load time**. Implemented deployment on Railway / Vercel / Render with a CI/CD workflow orchestrated through GitHub Actions..

TradeFlow – Portfolio & Transaction Management

Java Spring Boot MySQL Spring Data JPA Hibernate(ORM) Lombok

Rest APIs Spring security JWT

Developed Spring Boot + MySQL app for real-time trade & wallet management. Built modular REST APIs for orders, wallets & transactions. Secured access using JWT-based Spring Security and added Actuator health checks. Built RESTful APIs for order execution, balance updates, and transaction retrieval.

AI Email Assistant (Chrome Extension + Web App)

React Spring Boot AWS EC2 S3 Bootstrap Javascript

Rest APIs Cloudfront Gemini API Material UI

Engineered a scalable AI-powered email assistant using React (Vite), Material UI, and Spring Boot REST APIs. Integrated Gemini Generative AI for context-aware, tone-optimized email replies. Developed a Chrome Extension (Manifest V3) for real-time AI responses within email. Delivered the project end-to-end, from system design to cloud deployment. Resolved production-grade deployment challenges including 403/405 errors, and CloudFront origin routing, ensuring high availability. Deployed on AWS EC2, S3, and CloudFront with HTTPS, CORS, and cache optimization.
