Objective

As a Java Full Stack Developer with a strong foundation in both front-end and back-end technologies, I am eager to contribute my skills to your dynamic team. My experience in building scalable applications and my commitment to continuous learning align perfectly with your innovative projects. I am excited about the opportunity to collaborate with talented professionals and drive impactful solutions that enhance user experiences and meet business goals.

Experience

- **Uncodemy**
Java Full Stack Developer Intern
Gaining practical experience in building full-stack applications by utilizing Java, Spring Boot, MySQL, HTML, CSS, Bootstrap, JavaScript, and React, with a strong focus on implementing scalable REST APIs.
 - Designed and optimized persistence layers using Spring Data JPA, Hibernate, and relational mappings like One-to-Many and Many-to-One.
 - Performed CRUD operations, structured Entity-DTO-Repository layers, and implemented Exception Handling, Validation, and Pagination for better performance.
 - Integrated Spring Security with role-based authentication & authorization, implemented a custom login page, and protected endpoint access across modules (TradeFlow).
 - Built responsive, user-centric UI screens using HTML, CSS, Bootstrap, FontAwesome, improving cross-browser compatibility and mobile accessibility.

Education

- **Dr.A.P.J.Abdul Kalam Technical University (AKTU)** 2024
Master of Computer Application (MCA)
- **Mahatma Jyotiba Phule Rohilkhand University(MJPRU)** 2022
Post Graduate Diploma in Computer Application (PGDCA)

Technical Skills

- Frontend: HTML, CSS, JavaScript, Bootstrap, React
- Backend: Java, Spring Boot, Spring Data JPA, Spring security, Hibernate
- Database: MySQL
- Tools: Git, GitHub, VS Code, Eclipse
- Deployment: Vercel, railway, infinityfree

Projects

- **Personal Portfolio Website (React)**
Built a responsive personal portfolio using React to showcase frontend skills and projects. Integrated Web3Form API for handling contact form submissions without a backend. Deployed on Railway, ensuring fast and reliable online access.
- **TradeFlow – Portfolio & Transaction Management System**
TradeFlow is a Java Spring Boot-based Backend financial management system that helps users track their stock trades, wallet balance, and investment portfolio in real time. The application maintains a complete workflow from Order placement → Wallet transaction recording → Portfolio updates, ensuring data consistency.
Tech Stack: Java, Spring Boot, Spring Data JPA, MySQL, Lombok, REST APIs.
